this book predicts the decline of today's professions and introduces the people and systems that will replace them in an internet enhanced society according to richard susskind and daniel susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century the future of the professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction the authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals they argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few in their place they propose five new models for producing and distributing expertise in society the book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at

most tasks with a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century

this book provides the first book length study of the political and economic ideas of the british left s alternative economic strategy in the 1970s and early 1980s discussing the aes s approaches to capitalism the nation state and the working class it argues that existing academic accounts have significantly overstated the radicalism of the strategy perhaps more notable especially in the light of its stated revolutionary aims was the extent of its moderation its continuities with post war labour revisionism its marked reluctance to look beyond the market economy the degree of its preoccupation with britain s global economic status and its inability to break with labourist politics of class co operation in the national interest while the book argues that the aes was the last class politics socialist initiative in mainstream british politics it also explores the ways in which its ideas perhaps prepared the way for new labour in the 1990s and its relationship with corbynism since 2015

this internationally conducted study of the latest construction industry practices addresses a broad range of information and communication technology applications drawing on research conducted in the us and uk this book presents the state of the art of various ebusiness processes and examines bim virtual environments and mobile technologies innovation is a theme that runs throughout this book so in addition to the direct impact of these new technical achievements it also considers the management styles that helped them to emerge examples from industry are illustrated with case studies and presented alongside research from some of the best known academics in this field this book is essential reading for all advanced students and researchers interested in how ict is changing construction management and the construction industry

international banking and finance law series 39 digital finance and regulatory competition regulating distributed ledger technology based financial products and services lucien j van romburg governments like people compete against each other but do so in a bid to achieve their myriad socio economic and political aims in the operation of regulatory competition governments may create rules with the intent of attracting capital and labour to their domains in the twenty first century regulatory competition takes on a new dimension in the face of the rapid advancement of digital finance the role of financial technology fintech as a tool through which governments achieve their aims cannot be overstated the proliferation of distributed ledger technologies dlt marked a watershed moment for technological advancement and presented a ripe opportunity for governments to defend their competing claims for resources in this context this book tackles the question of whether the world s

leading financial centres hong kong london and new york engaged in regulatory competition against each other through their creation of rules to govern dlt based financial products and services during the period 2008 until 2022 in answering this question this book provides a cohesive framework for understanding the influence of regulatory competition on rule creation using a narrative lens based on a comparative study of legal regulatory and policy instruments the lessons distilled from the analysis provide reasoned observations on the potential implications for the future regulation of financial products and services underlined by novel technologies the topics covered in this book which concern the timely intersection of regulatory competition and fintech include the emergence and impact of dlt its core features types use cases and applications in the financial services industry origins of regulatory competition from charles tiebout to the regulatory races to the top and bottom formulation of a definitional matrix which provides a cohesive framework for understanding regulatory competition regulatory frameworks for dlt based financial products and services in hong kong london and new york and potential impact of regulatory competition on the future regulation of financial products and services underlined by novel technologies this book represents one of the very few studies comprehensively tackling the topic of regulatory competition through the guise of fintech it will deepen the understanding of lawmakers policymakers and regulators concerning the influence and significance of regulatory competition the discussion surrounding the regulation of dlt based financial products and services will also be of interest to practitioners students and general readers alike

with the uk government s 2016 bim threshold approaching support for small organisations on interpreting filtering and applying bim protocols and standards is urgently required many small uk construction industry supply chain firms are uncertain about what level 2 bim involves and are unsure about taking first steps towards having bim capability as digitisation increasingly impacts on work practices getting to grips with bim offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design construction and whole life use of buildings

the uk s changing democracy presents a uniquely democratic perspective on all aspects of uk politics at the centre in westminster and whitehall and in all the devolved nations the 2016 referendum vote to leave the eu marked a turning point in the uk s political system in the previous two decades the country had undergone a series of democratic reforms during which it seemed to evolve into a more typical european liberal democracy the establishment of a supreme court adoption of the human rights act scottish welsh and northern irish devolution proportional electoral systems executive mayors and the growth in multi party competition all marked profound changes to the british political tradition brexit may now bring some of these developments to a juddering halt the uk s previous exceptionalism from european patterns looks certain to continue indefinitely taking back control of regulations trade immigration and much more is the biggest change in uk governance for half a century it has already produced enduring crises for the party system parliament and the core executive with uniquely contested governance over critical issues and a rapidly changing political landscape other recent trends are no less fast moving such as the revival of two party dominance in england the re creation of some mass membership parties and the disruptive challenges of social media in this context an in depth assessment of the quality of the uk s democracy is essential each of the 2018 democratic audit s 37 short chapters starts with clear criteria for what democracy requires in that part of the nation s political life and outlines key recent developments before a swot analysis of strengths weaknesses

opportunities and threats crystallises the current situation a small number of core issues are then explored in more depth set against the global rise of debased semi democracies the book s approach returns our focus firmly to the big issues around the quality and sustainability of the uk s liberal democracy

a comprehensive guide to empirically supported approaches for child protection cases the wiley handbook of what works in child maltreatment offers clinicians psychologists psychiatrists and other professionals an evidence based approach to best professional practice when working in the area of child protection proceedings and the provision of assessment and intervention services in order to maximize the well being of young people it brings together a wealth of knowledge from expert researchers and practitioners who provide a comprehensive overview of contemporary work informing theory assessment service provision rehabilitation and therapeutic interventions for children and families undergoing care proceedings coverage includes theoretical perspectives insights on the prevalence and effects of child neglect and abuse assessment children s services and interventions with children victims and families

research skills for journalists is a comprehensive engaging and highly practical guide to developing the varied skillset needed for producing well researched quality journalism across a range of platforms illustrated with original interviews and case studies the book guides readers through a clear understanding of sources of news as well as illustrating the skills needed to undertake successful digital and non digital research and to conduct interviews for a variety of media it examines the skills needed for basic data journalism and presents an in depth exploration of the different research skills specific to producing print and online text as well as those for broadcast and multimedia journalism key research skills explored in the book include developing digital research skills including researching through search engines messages boards discussion groups and web forums social media apps and using user generated content working with data including sourcing auditing and analysing data data visualisation and understanding the importance of accuracy and context essential non digital research skills including telephone technique using libraries and working with librarians understanding copyright working with picture libraries and research services and producing freedom of information requests working directly with people to research stories including the power of persuasion tracking down great contributors managing and protecting sources planning and managing interviews and interviewing vulnerable people researching for multimedia production of stories including researching a radio story podcast or video story and planning for outside broadcasts research skills for journalists also explores specialist research skills needed for working overseas and investigates new areas which could be used for journalism research in the future the book is illustrated with original contributions by journalists from a variety of backgrounds including veteran investigative journalist john pilger pioneering data journalist simon rogers and the bureau of investigative journalism s award winning reporter abigail fielding smith it is an invaluable guide for students and practitioners of journalism to the skills needed for finding and developing original news stories today

this book examines the relationship between intellectual property in pharmaceuticals and access to medicines from a human rights perspective with a view to contributing to the development of a human rights framework that can guide states in enacting and implementing intellectual property law and policy the study primarily explores whether conflicts between patents and human rights in the context of access to medicines are inevitable or whether patents can be made to serve human rights what could be a normative framework that human rights might provide for patents

and innovation joo young lee argues that it is necessary to have a deepened understanding of each of the two sets of norms that govern this issue that is patent law and international human rights law the chapters investigate the relevant dimensions of patent law and analyse particular human rights bearing upon the issue of intellectual property and access to medicines this study will be of great interest to academic specialists practitioners or professionals in the fields of human rights trade and intellectual property as well as policy makers activists and health professionals across the world working in intellectual property and human rights

this is the first book to focus on international efforts to address syrian chemical weapons issues in an international law context it provides an overview of the process of control over syrian compliance non compliance with international obligations including the keys to success in eliminating syria s stockpiles and reasons for difficulties in handling multiple uses of toxic chemicals as weapons in domestic armed conflicts it also addresses collective and unilateral sanctions against syria outside of international institutional frameworks and their implications for subsequent cases supported by extensive analyses of developments within the opcw executive council and the un security council this book is recommended for readers seeking insight about chemical weapons issues and dynamism of international law

corporate governance and the nuclear industry explores the uk nuclear legacy governance issues associated with the decommissioning of a range of early generation civil nuclear facilities this book traces how we got here and the risks that have been taken whilst presenting new research and thinking that is required to manage our nuclear legacy the book addresses a new analytical approach using notions of governance to review key historic events this approach analyses these events using concepts of stakeholder control accountability and regulation using these concepts and undertaking a more detailed analysis of the legacy s current governance arrangements the conventional public sector based solutions that attempt to harness private sector expertise this book will contrast these with government responses to determine the degree of control over the legacy and any possible control issues corporate governance and the nuclear industry concludes that we need to recognise the legacy s problems as exceptional rather than prosaic and suggests that this requires exceptional governance solutions rather than the current form that is clearly failing

the report is an annual report which is presented for the first time this year it currently comprises 25 national reports regarding each state and the tendencies of islamophobia in each respective country

the anticipated reduction in the duration of architecture education in the uk and across europe has encouraged a sense of collective openness towards exploring other models of professional education delivery there s never been a better time to be thoughtfully innovative and take the initiative this book provides a much needed debate about the future of architectural education placing it within its unique historic tradition and raising fundamental questions such as who should be teaching architecture where should they be situated and should it be viewed as an interdisciplinary rather than silo based subject featuring voices as varied as digital strategists students and client managers radical pedagogies consolidates academic and well as practice based evidence into a set of actionable insights aimed at empowering schools educators and students alike
