This book takes a new approach to travel writing about Latin America by examining domestic journey narratives that have been produced by travellers from the continent itself and largely in Spanish. Historically, travel writing about Latin America has been written primarily from the perspective of the foreign, often European traveller, as such. And following the large influx of military, scientific and leisure travellers in the region since its colonisation, much of this foreign travel writing has depicted the continent in predominantly exoticist and/or imperialist terms. Lindsay explores how Latin American travellers have conceived and constructed narratives about travel at home and considers how such texts, many of them available in English translation or with subtitles, function to counter or corroborate long-standing myths about the continent through a series of regionally and thematically oriented case studies that engage with key issues, themes and debates in both Latin American and travel studies. Lindsay provides the first sustained interdisciplinary study of contemporary domestic travel narratives about the region and will also comprise an important intervention into methodological debates about travel and travel writing.

At the crossroad of intellectual, diplomatic and cultural history, this book examines flows of information, men and ideas between South American cities, mainly the port capitals of Buenos Aires and Rio de Janeiro during the period of their modernization. The book reconstructs this largely overlooked trend toward connectedness both as an objective process and as an assemblage of visions and policies concentrating on diverse transnational practices such as translation, travel, public visits and conferences, the print press, cultural diplomacy, intertextuality and institutional and personal contacts inspired by the entangled history approach and the spatial turn in the humanities. The book highlights the importance of cross-border exchanges within the South American continent; it thus offers a correction to two major traditions in the historiography of ideas and identities in modern Latin America: the predominance of the nation-state as the main unit of analysis and the concentration on relationships with Europe and the U.S. as the main axis of cultural exchange. Modernization, it is argued, brought segments of South America's capital cities not only close to Paris, London and New York as is commonly claimed, but also to each other, both physically and mentally, creating and recreating spaces, ways of thinking and cultural-political projects at the national and regional levels.

the poetry of the americas provides an expansive history of relations between poets in the us and latin america over three decades from the good neighbor diplomacy of world war ii to 1960s cold war cultural policy

it was the regard for frank in fact that perhaps best helped to win friends for the good neighbor policy among latin americans

this book examines the work of prominent south african geologist alex du toit as a means of understanding the debate around continental drift both in segregation era south africa and internationally it contextualises du toit s work within a particularly formative period of south african science from the paleoanthropological discoveries that sparked debates about the origins of humankind to jan smuts own theory of holism beyond south african scientific discoveries the book sets du toit s work against a backdrop of ideological struggles over space both domestically in terms of segregation and nationalism as well as internationally as south africa sought to assert its position within the

commonwealth these debates were embodied by du toit s work on the theory of continental drift which put africa and south africa at the centre geologically and geographically the author also focuses on the divisions in geology caused by drift theory tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed it traces the history of continental drift from its inception in the nineteenth century and later work of alfred wegener which was both elaborated upon and substantiated by du toit the study further focuses on du toit s research on continental drift in south african and south america and the geological fossil and climatological evidence used to bolster this theory
